

Press release

Funke Medical GmbH expands product range with an arthrodesis seat cushion

Raesfeld, 28th March 2023

At the end of February, Funke Medical launched the ARTHROSEAT[®], an orthopaedic effective arthrodesis seat cushion. The seating aid can be used for various hip and knee joint indications. It relieves hip and knee joints when sitting, reduces pain and corrects incorrect posture.

Funke Medical is the market leader in Germany for soft positioning systems in the field of wound care. In addition to pressure ulcer therapy systems, its product range also includes ergonomic seating aids for dentistry and orthopaedics. The essential foundation of the high-quality foam-based product solutions from Funke Medical is its many years of in-depth knowledge of medical lying, sitting and positioning systems, which flows into the further development of innovative products that correspond to the range.

With the new product ARTHROSEAT[®], Funke Medical is adding an orthopaedic seating system to its portfolio. It is an arthrodesis seat cushion that can be used for different types of complaints in the hip and knee areas. Typical indications are postoperative care after surgical procedures on the hip or knee, arthrosis in the hip or knee joint, slipped discs and amputations on the lower extremities.

The innovative ARTHROSEAT[®] combines many advantages

By relieving the positioning of the hip and knee joints, the seating aid contributes to pain relief. The cushion, which can be used for both left and right hip or knee injuries, compensates for incorrect posture caused by restricted pelvic tilt, as the unilaterally lowered seat surface and the anatomical body shape ensure a comfortable and ergonomically ideal sitting position. In addition to the orthopaedic advantages, the ARTHROSEAT[®] is well thought out in its handling. The cushion can be easily transported with the carrying handle, the removable cover is washable and resistant to wiping disinfectants, and the open-pored foam and breathable cover ensure optimum sitting comfort. The ARTHROSEAT[®] arthrodesis seat cushion is now available in medical supply stores.

Funke Medical GmbH is one of the leading German manufacturers of decubitus therapy systems and seat elements for dental medicine in Germany. In November 2021, Harald Quandt Industriebeteiligungen GmbH acquired a majority stake in Funke Medical GmbH. Founded in 1988 in Raesfeld, the medium-sized company manufactures and supplies its customers in Germany and abroad from there. Free digital services complete the product range, e.g. the Funke Medical online academy for further education in healthcare sector and a web-based tool to receive the latest user manuals in all languages.
